## COMPANY PROFILE

Ceramirupe is a Portuguese stoneware manufacturer that has bet since its foundation in 1987, on excellence and quality in the production of dinnerware and serving items.

Our team is the source of our company spirit and the reason behind Ceramirupe's existence. Using a combination of the most advanced technologies and the experience of our ceramists, we assume a commitment of maximum effort and dedication. We carefully research and develop the best solutions and products for our collections so as to best meet market demands.

For us, each project is unique. Our passion for sophistication and love of detail are present from the moment of creation to the moment in which our products are produced and shipped all around the world. We work with pure stoneware, which after being moulded, will give origin to unique items, the fruit of our passion for ceramics. We differ due to our low porosity stoneware and our work with reactive glazes which, after fusing during high temperature firings, result in unique and surprising reactions. These character filled finishes allow each one of our items to be one-of-a-kind.

Our collections are inspired by Nature. They're developed with a contemporary design where we ally function and aesthetics, following the latest trends so as to better serve our customers and capture new enthusiasts/admirers. Furthermore, they are made from strong stoneware which makes them microwave and dishwasher safe so ideal for everyday use at your favourite restaurant.

## PRODUCTS

Dinnerware and serving items in low porosity stoneware.

## TRADEMARK

Ceramirupe

## EXPORT MARKETS

Ceramirupe works 99% for export from which we highlight our largest markets: USA; UK; The Netherlands; Germany; Switzerland and Denmark.
