## COMPANY PROFILE

Hydrumedical, operates in the segment of the Medical Area. It began its activities in May 2016, based in Portugal. It has the Know How in natural-origin polymer processing and stands out in the application of biocompatible and biodegradable materials in the development of solutions for urology and orthopedic implant areas. The company has pioneered the development of a biodegradable ureteral stent. Soon became a multiaward-winning company and gathered a multi skilled team, that gave the lead to develop innovative medical devices in Urology but also in Stoma Care, Infection Control and Sports Medicine. All products are produced in ISO class 8 and 7 clean room.

## PRODUCTS

- **Hydrustent®** - First Biodegradable Ureteral Stent intended to be used to temporary drain obstructed ureter. The patented structural hydrogel has a homogeneous degradation.
- **Hydrustoma® C3**- compact 3-piece ostomy capsule system developed to enable colostomate patients to control gas and content release.
- **Precision MR® Sinintegra** - Safer. Faster. More accurate. Medical device indicated for meniscus repair in all-side technique.
- **Meniscus 4All® Sinintegra** - Device developed for meniscal repair with inside-out technique, using continuous suture technique.

## TRADEMARK

- Hydrumedical, Hydrustent, Hydru, Hydrustoma.
- Sinintegra, Sinfix.

## EXPORT MARKETS

EAU, Europe, Brasil, EUA, China, Japan
