Agemsoft

**SECTOR**

ICT, Education

WEBwww.agemsoft.sk**COMPANY PROFILE**

With 20 years' digital education experience, AGEMSOFT aims to change the teaching process. We deliver innovative products and educational projects for nursery, primary and secondary school pupils.

We have extensive experience implementing educational projects for clients of all sizes and specialisations.

We develop our own products and educational materials with an emphasis on pedagogical innovation that can modernise teaching and turn schools into contemporary institutions.

We operate the Kozmix and World Phenomena portals, and manage other educational platforms for our clients.

We have successfully cooperated with the Ministry of Education, Science, Research and Sport of the Slovak Republic, Tatra banka, BBC, Samsung, Microsoft, IBM, Atos, Slovak Telekom, Sanoma Learning, SMART, British Council, etc.

Daitable

SECTOR
ICT

WEB
www.daitable.com

COMPANY PROFILE

At DAITABLE, we are a newly formed startup that is focused on changing the way businesses conduct their operations. Our mission is to streamline data management and make it simpler for businesses to operate in today's fast-paced world.

Our vision is to create a platform that can be easily integrated into a company's existing systems and processes. We believe that by doing this, businesses can save time and resources that can be used to push innovation and progress forward.

At DAITABLE, we value transparency, collaboration, and innovation. We believe that by working together, we can achieve great things and that every voice and idea should be heard and evaluated.

Our goal is to help businesses of all sizes become more agile, efficient, and sustainable. We believe that by providing a simple and streamlined data management solution, we can help businesses unlock their full potential and achieve their goals.

Goldmann Systems

SECTOR
ICT

WEB
www.goldmann.sk

COMPANY PROFILE

We have been operating on the market since 2000. Our goal is to provide reliable, robust and flexible solutions that will help our clients and partners in managing business processes and meet their expectations in the field of information technology development.

Košice IT Valley

SECTOR
ICT

WEB
www.kosiceitvalley.sk

COMPANY PROFILE

We represent the technology sector of eastern Slovakia. Our vision is to create a technologically advanced and innovative business environment in Eastern Slovakia. We want the Eastern Slovakia region to become a centre of excellence for entrepreneurship, research and education and a place where technological solutions with global impact are developed.

We strive to create an environment where talented people can find high value-added jobs and get ahead, and where companies can grow and develop. We want to improve the quality of life for people in the region and bring added value not only to the local community, but also to the whole of Slovakia and international markets.

The portfolio of activities of Košice IT Valley includes activities supporting the individual pillars of the cluster, projects and cooperation with various institutions — Supporting communities, ESG Awards, Networking meetings, Supporting women in ICT, Let's educate virtually, Live IT Projects, conference Region of the future – The future of the region, CEO Talks, Workshop programme, Košice Academy of Software Development, Lab IT Creativity, Slovak Women in Tech, Zborovňa conference for teachers.

Luigi's Box

SECTOR
ICT

WEB
www.luigisbox.com

COMPANY PROFILE

Luigi's Box is an award-winning AI powered search and product discovery solution. It provides personalized search, recommendations and product listing for leading eCommerce companies in Europe.

NATIONAL
SUPERCOMPUTING
CENTRE

SECTOR

High Performance Computing (HPC), Artificial Intelligence, R&D, Digital Transformation

WEB

www.eurocc.nsc.sk

COMPANY PROFILE

The National Supercomputing Centre (NSCC) is Slovakia's national coordination body for advanced computing. NSCC hosts and umbrellas the National Competence Centre (NCC Slovakia) within the EuroCC network. Through NCC Slovakia, NSCC supports companies, research institutions, and public administration in adopting HPC, AI, and Big Data—via awareness and outreach, training, use-case mentoring, and facilitation of access to Slovak/EU HPC capacities and “test-before-invest” pilots.

Nexineo

NEXINEO

SECTOR
ICT

WEB
www.nexineo.com

COMPANY PROFILE

The Slovak company NEXINEO develops and delivers unique virtualized computing equipment that significantly optimizes IT operating costs and is currently used by more than 550 schools in four EU countries.

Instead of a computer or laptop, every student has only a miniature NEO virtual desktop device, consuming 5 W and weighing 300 g. Performance and data for tens or hundreds of users is supplied by a central NEXI server. Nothing changes for the students, they work in the familiar Windows operating environment, just as if they were sitting at a conventional computer.

The NEXINEO solution delivers up to 90% energy savings, 90% CO₂ savings and 90% electricity waste savings compared to conventional computers. It also delivers high operational savings due to the long lifetime of NEO virtual desktop devices, their minimal failure rate and minimal management requirements.

NEXINEO has also developed a special NEXI Board management console for schools, which allows teachers to conveniently control the entire teaching process from their seat.

Gospace Labs

SECTOR

Smart cities, Internet of Things, Clean Water

WEB

www.gospace.tech

COMPANY PROFILE

GOSPACE LABS s.r.o. is a company providing "Internet of Things" for space, smart city and blue economy sectors. Historically, the team constructed the first slovak satellite from grass root designs.

Next, internet of things helps cities implement smart sensors and technologies, especially in smart parking utilization. The newest segment is in blue economy, measuring the impact of climatic change and sewage treatment systems on the water.

IoMobility Solutions

**SECTOR**

Smart cities

WEBwww.iomobility.eu**COMPANY PROFILE**

IoMobility Solutions is a Slovak technology company focused on creating smarter, more sustainable cities.

We develop a modular platform that integrates transport, parking, EV charging, lighting, and other smart city verticals into one digital twin. This unified system allows municipalities to manage infrastructure in real time and improve efficiency.

Our solution reduces operational costs while enhancing transparency and citizen satisfaction. We are currently expanding our presence in European markets and building strong strategic partnerships.

Virtual Medicine

VIRTUAL MEDICINE

SECTOR

Health/ICT

WEB

www.medicinevirtual.com

COMPANY PROFILE

VIRTUAL MEDICINE, a leader in XR medical anatomy education, developed the multiple award-winning Human Anatomy VR, used by hundreds of thousands people in over 180 countries of the world with notable customers like Stanford University, Mayo Clinic, Penn Med, University of California, United States Coast Guard Academy, University of Illinois, Queen Mary University of London, Medical University of Vienna, Hannover Medical School, Victoria University Melbourne, etc.

Virtual Medicine represented Slovakia as the finalist of the European Commission 's Ideas from Europe 2017, Global Student Entrepreneur Awards 2017 and at US Department of State 's Global Entrepreneurship Summit 2017 and 2019. Human Anatomy VR (<https://www.youtube.com/watch?v=fbfLqdhgOW4>) is making learning more effective, more interactive and more entertaining.

Our technology increased knowledge of students by more than 45% when they were tested. Thanks to our platform 92% of students said that the platform greatly contributed to their improved learning and understanding of anatomy, 92% of students would like to have more subjects (eg. physiology, histology, immunology,...) in VR and 94% would recommend our platform to their friends.

Human Anatomy VR is the first and currently the only anatomical VR application available to the general public on the global Playstation VR store and has recently seen great success on the PSVR 2 platform. As one of only three educational titles among only 179 AAA products on PSVR 2. Our application has not only made an impact but also received very positive feedback from the community. This is evident from the over 90,000 views and encouraging comments our trailer received on the official PlayStation channel, which you can view here: <https://youtu.be/T-q5i8NFZNI>.

Applied Precision

SECTOR

Electrotechnics

WEB

www.appliedp.com

COMPANY PROFILE

"APPLIED PRECISION is a modern Slovak innovative company with sound scientific background, creative power of young academic research and development team, up-to-date technologies and decades of theoretical and practical experience in field of metrology and applied physics with worldwide scope established in 1992. Company belongs to world top three companies producing electricity meter testing and calibration systems.

The company is focused on development and production of special measuring equipment, software and services:

- Special development of devices with accuracies ranging up to level requested by national laboratories
- Development and manufacture devices and equipment for high precision and special measurement and test task
- Original technical solutions protected by number of patents at national and international level
- Authorized calibration and test laboratories for internal and external use
- ISO 9001:2015, ISO 17025 / Accredited Laboratory

Products of Applied Precision: complete portfolio of products for testing and calibration of electricity meters Measuring test benches for electricity meters ELMA (Electricity Meter Test Equipment)

Automated test equipment for electricity meters - Modular Customizable Design.

Easy to Use Control Software. Meter Testing According to International Standards.

Smart Meters Compatible. Integrated Simultaneous Meter Data Exchange.

Accuracy up to 0.01%.

- Portable equipment for measurement in the field (at customer / at the point of supply)

Portable Test Equipment (PTE)

Compact Design – Source and Reference in One Package. Voltage 3 x 300 V / 30 VA. Current 3 x

120 A / 60 VA. Generation of Harmonics and Ripple Control Signals. Remote Control from PC.

Wireless Control from Android Device. Accuracy up to 0.02%

Working Standard (WS)

Meter Error Evaluation. Dial Test, Maximum Demand Test. Meter Data Readout. Transformer

Test. Wide Range of Accessories. Accuracy up to 0.02%

Services:

- Accredited laboratory in accordance with ISO 17025
- Calibrations and measurements of electrical quantities
- Solutions proposal for measurements"

Digitálna koalícia (Digital coalition)

SECTOR

Digital/ICT

WEB

www.digitalnakoalicia.sk

COMPANY PROFILE

Digital Coalition is a national initiative established at the initiative of the European Commission within the framework of the Digital skills and jobs coalition policy. Its mission is to improve digital skills in Slovakia. The organisation was established in 2017 at the initiative of the Office of the Deputy Prime Minister of the Slovak Republic for Investment and Informatisation and the IT Association of Slovakia.

DK currently brings together almost one hundred members – key stakeholders in the field of education and ICT in Slovakia. Members join the Digital Coalition voluntarily and free of charge by signing up to the Digital Coalition Members Memorandum at the same time as making valuable commitments to manage the impact of Industry 4.0 on human resources – the digital transformation of society (by 2020) and activities and professional contributions supporting the enhancement of digital skills.

EXIMBANKA SR

EXIMBANKA SR

SECTOR

Banking

WEB

www.eximbanka.sk

COMPANY PROFILE

EXIMBANKA SR is a State-owned export - credit agency. It represents the only direct financial instrument of the State for export support providing both banking and insurance services.

The primary objective of EXIMBANKA SR is to allow Slovak exporters to enter into projects and territories, where the commercial financial sector shows less interest in taking over risks. Its task is to improve the economic exchange of the Slovak Republic with foreign countries, to increase the competitiveness of Slovak producers on foreign markets, as well as to promote the export of the largest possible volume of products with a high level of added value. The purpose is to provide State support that does not interfere with market conditions, does not distort the market and does not allow producers from one country to be favoured to the detriment of others.

The philosophy of EXIMBANKA SR is based on the interest of providing exporters with risk mitigation and the opportunity to offer favourable trading conditions to their foreign partners. EXIMBANKA SR offers a wide range of financial products. On the export side, it is mainly credit insurance, financing and guarantees. On the import side, it is financing of imports of technologies that ultimately allow the export of better quality production with a high degree of added value.

The products of EXIMBANKA SR are intended for small, medium-sized, as well as large Slovak business entities, primarily for manufacturers of goods and providers of services intended for export. In relation to the commercial financial market, EXIMBANKA SR performs a complementary role. It makes it possible to carry out exports to territories with a higher level of country risk, even for large projects with long payment delays. It encourages investment abroad, in particular when setting up joint ventures.

Impact Nation Institute

SECTOR

Business Development & Support Services

WEB

www.impactnation.institute

COMPANY PROFILE

Impact Nation Institute (INI) is a Slovak venture-building and impact investment organization, dedicated to solving critical social challenges through technology-driven startups. We specialize in supporting very early-stage founders, providing investment, strategy, and scaling support with a focus on social services, healthcare, education, and long-term care.

Our Unique Value:

- Holistic support from idea stage to international growth
- Focus on measurable impact (UN SDGs)
- Scaling across Europe via unified EU regulations and funding programs
- Bridging the innovation gap in Central & Eastern Europe

Our Current Portfolio

We manage a Special Purpose Vehicle (SPV) consolidating five impact startups:

1. Converga – Digital inclusion management system for cities, NGOs, and refugee support services
2. Malina – National platform connecting hospitals, families, and long-term care services
3. Vyskilluj – Gamified movement platform improving children's health and literacy
4. Opatrio – CRM for professional home care service providers
5. Silvergon & MediScope – Family caregiving coordination app and AI-powered health monitoring device

Vision & Goals

Our 10-year goal is to reach 5 million people worldwide, delivering 10+ scalable solutions that generate measurable savings in health and social systems

SIEA — Slovak Innovation & Energy Agency

SECTOR

Energy

WEB

www.siea.sk

COMPANY PROFILE

The Slovak Innovative and Energy Agency (SIEA) is a professional contributory organization established by the Ministry of Economy. Its task is to provide technical and professional background in accordance with innovation and energy legislation. It participates in the implementation of EU directives and the updating of the innovation strategy and energy policy of the SR.

It is also involved in the preparation of support programs and projects dedicated to energy savings, the use of renewable energy sources, and innovation, and since 2015, SIEA has also taken on the role of a technology agency. It also performs the function of an implementing agency and an intermediary body for application of EU structural funds and funds from the Recovery and Resilience Plan.
