STERIFAST – STERILIZATION & DISINFECTION SYSTEMS, LDA.
DUBAI WORLD TRADE CENTRE

WWW.STERIFAST.COM

COMPANY PROFILE

Sterifast Lda. is a leading company in Low Temperature Hydrogen Peroxide Sterilization Systems (Low Concentration). Our ECOPlasma system uses only 35% H₂O₂ concentration and it is designed to sterilize medical devices in general and thermo-sensitive medical devices. The ECOPlasma process with much lower concentration allows the shipment of the sterilizing agent by air. The process and device are protected by the patent PCT/PT2007/000029 with international publication number WO2009008755 A1.

We offer to our clients complete and customized medical packaging solutions.

All products have always been subjected to strict quality inspections and our team applies for continuous improvement and compliance of applicable standards and requirements. STERIFAST is on its way to stop infection and improve the performance of the bacterial barrier, while still saving on costs. We also present our calibration and QC laboratories for autoclave validation.

STERIFAST is a Known Consignor for air cargo (PT/KC/0006-01)

PRODUCTS

Low temperature hydrogen peroxide (plasma) sterilizer
Sterilization packaging:

- Roll
- Pouch
- Crepe paper

Sterilization biological indicators
Sterilization chemical indicators

TRADEMARK

Sterifast; Ecoplasma; Approved

EXPORT MARKETS

Europe, Middle East, Africa.
